Professional Summary

Full Stack Engineer with **2+ years** building **Generative AI** products at CustomerInsights.AI. Owns core use cases of **ciATHENA**, an AI agent platform for pharma commercial teams, from **React.js/TypeScript** screens to **Python/FastAPI** services for **6+ pharma clients**, including **LangGraph** agents with human approval and **RAG** on **Azure OpenAI**. Co-designed a configuration-driven backend that cut new-client onboarding effort by about **50%**. Promoted to Associate Full Stack Engineer in April 2026; two-time **Employee of the Quarter** (Sep 2025, Sep 2026).

Technical Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Zustand, ECharts
- **Backend & Data:** Python, FastAPI, Node.js, Express.js, REST APIs, JSON, Server-Sent Events, PostgreSQL, Snowflake, SQL, MongoDB
- **Generative AI:** LLM, RAG, AI Agents, LangChain, LangGraph, Azure OpenAI, Embeddings, Vector Search (Chroma)
- **DevOps & Testing:** Docker, Microsoft Azure, GitHub Actions (CI/CD), Git, GitHub, Jest, pytest, Jira
- **Practices:** Agile/Scrum, Code Review, Debugging, Performance Optimization, System Design

Experience

CustomerInsights.AI (CIAI) Gurugram, India

Associate Full Stack Engineer ***Apr 2026 - Present***

*Full-stack owner of ciATHENA's pharma use cases in a **20+ member team**. **Employee of the Quarter**, September 2026.*

- Own **4+ core use cases** of ciATHENA (MMM, FAST, Payer Spine, Data Stewardship) end to end, from **React.js** and **TypeScript** screens to **FastAPI** services, for **6+ pharma clients**, each with client-specific data and features.
- Built the Field Intelligence backend and **3+ AI agents** in **LangChain** and **LangGraph**, with configuration screens, an execution service and a human approval step before every agent action.
- Implemented production **RAG** on **Azure OpenAI** with embeddings and **Chroma** semantic search, so business users ask plain-language questions and get answers from their own client data.
- Cut new-client onboarding effort by about **50%** by co-designing a configuration-driven backend: a new client or use case now needs setup, not a rebuild.
- Shipped **50+ FastAPI endpoints** as **Docker** services on **Azure** with **CI/CD** in **GitHub Actions**; results stream to the UI over **Server-Sent Events**.
- Maintained **PostgreSQL** and **Snowflake** backends for 3 data workflows: schema and entity review, mapping and batch approvals.
- Delivered 3 collaboration modules (ongoing threads, team collaboration, insights hub) with **ECharts** and **Zustand**.

Junior Data Engineer ***Sep 2024 - Mar 2026***

*Frontend development for ciATHENA. **Employee of the Quarter**, September 2025.*

- Built the interface for ciATHENA's first **5-6 use cases** in **React.js**, **Next.js** and **TypeScript**, turning logic specified by pharma business experts into working screens.
- Shipped the Field Intelligence **MyDay** and **District View** screens and their charts.
- Launched a streaming analytics chat over **Server-Sent Events**, with session restore and duplicate-request guards.
- Built **10+ reusable components** shared across use cases; fixed an **ECharts** bug that restored **11 product series** across 21 months and added **14 regression tests**.
- Delivered features for **4 client-facing analytics products** with **REST API** integration and responsive design.

Projects

Portfolio Website - Next.js 16, React 19, TypeScript [GitHub] *Sep 2026 - Oct 2026*

- Built and deployed a portfolio with case studies, dark/light themes and animated SVG; it auto-deploys to Netlify on every push to main.

Churn Prediction & Analysis - Python, scikit-learn, Flask [GitHub] *Nov 2023 - Dec 2023*

- Built a machine learning model that predicts customer churn with **~93% accuracy**, served through a Flask app.

SkySketch - Python, OpenCV, MediaPipe [GitHub] *Sep 2023 - Oct 2023*

- Developed a real-time drawing app controlled by hand gestures, tracking the index finger with OpenCV and MediaPipe.

Education

B.Tech, Computer Science & Engineering - Graphic Era Hill University, Bhimtal · CGPA 8.62 *Aug 2020 - Aug 2024*

Certifications

Data Analysis with Python (IBM); Google Data Analytics (Coursera); Forage job simulations: Accenture Nordics Developer, JPMorgan Software Engineering
