Professional Summary

Full Stack Engineer with **2+ years of experience** at CustomerInsights.AI, an AI analytics company serving life-sciences commercial teams; promoted from **Junior Data Engineer** to **Associate Full Stack Engineer** in 2026. I work across the stack: **React.js**, **Next.js**, and **TypeScript** on the frontend, **Node.js/Express** and **Python/FastAPI** on the backend, and SQL throughout. Shipped features for **4 client-facing products** and built **10+ reusable components** in a 20-member agile team; now building **retrieval-augmented generation (RAG)**, **semantic search**, and **Unified Data Modeling** for ciATHENA 2.0.

Experience

CustomerInsights.AI (CIAI)

Gurugram, India

Associate Full Stack Engineer

Apr 2026 – Present

Full-stack ownership on ciATHENA: closing out 1.0 and building the AI and data-modeling layer of 2.0.

- Own end-to-end delivery of features across **React.js**, **Next.js**, and **TypeScript** on the frontend and **Node.js/Express.js** and **Python** on the backend; took **ciATHENA 1.0** to release and started **ciATHENA 2.0**.
- Build backend services in **Python** and **FastAPI** for ciATHENA 2.0, with async endpoints and typed request/response validation behind data- and AI-driven features.
- Develop **RAG** and **semantic search** so users can query platform data in plain language, using text embeddings and vector retrieval to ground answers in real records.
- Build **Unified Data Modeling (UDM)** workflows: source, schema, and table selection, entity and column review, mapping explanations, and batch approvals, with role-based permissions.

Junior Data Engineer

Sep 2024 – Mar 2026

Built analytics interfaces and data-review workflows for ciATHENA 0.1 and 1.0, along with the data validation behind them.

- Built production UI in **React.js**, **Next.js**, and **TypeScript** for ciATHENA 0.1 and 1.0, including **10+ reusable components** that cut duplicated code and sped up feature delivery.
- Shipped features for **4 client-facing products** used by life-sciences clients (**LENS**, **TPA**, **CORE**, and **Patient Flow**), with REST API integration and responsive desktop-to-tablet layouts.
- Built conversational analytics interfaces with streaming **Server-Sent Events (SSE)**, session restore, and duplicate-request guards; fixed an **ECharts** bug that recovered **11 product series across 21 months**, covered by **14 regression tests**.
- Contributed to data-review and match-and-merge (MDM) workflows: review screens, batch approvals, and safeguards that hold uncertain matches for human review, backed by **Python** and **SQL**.
- Added **Jest** unit tests, ran end-to-end QA (edge cases, empty and error states, regression), and refactored **5+ modules**.

Technical Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, React Hooks, Context API, Material UI, Zustand, TanStack Query, ECharts, Responsive Design, Component Architecture, Performance Optimization
- **Backend & APIs:** Node.js, Express.js, Python, FastAPI, REST API Design, Server-Sent Events, JSON, PostgreSQL, SQL, MongoDB, Pagination & Filtering
- **AI & Data:** Retrieval-Augmented Generation (RAG), Semantic/Vector Search, Text Embeddings, LLM Integration, Unified Data Modeling (UDM), Data Validation & Normalization
- **Testing & Quality:** Jest, pytest, End-to-End QA, SonarQube, Code Review, Debugging, Root-Cause Analysis
- **Tools & Practices:** Git, GitHub, Figma, Microsoft Azure, VS Code, Agile/Scrum, SDLC, Jupyter Notebook, Power BI

Projects

Developer Portfolio – Next.js 16, React 19, TypeScript [\[GitHub\]](#)

2026

- Built a statically exported portfolio on the Next.js App Router, using server components by default and client components only where there is interaction, with light and dark themes and animated SVG.

Churn Prediction & Analysis – Python, scikit-learn, Flask [\[GitHub\]](#)

Nov 2023 – Dec 2023

- Built an end-to-end ML pipeline (EDA, feature engineering, SMOTEENN rebalancing, Decision Tree and Random Forest) reaching **~93% accuracy**; served predictions through a Flask app and wrote churn-reduction recommendations.

SkySketch – Computer Vision Drawing App [\[GitHub\]](#)

Sep 2023 – Oct 2023

- Developed a real-time, gesture-controlled drawing canvas using OpenCV, NumPy, and MediaPipe, and tuned the hand tracking until strokes followed the hand smoothly.

Education

B.Tech, Computer Science & Engineering – Graphic Era Hill University, Bhimtal · CGPA 8.62

Aug 2020 – Aug 2024

Certifications

- Data Analysis with Python – IBM / Cognitive Class; Google Data Analytics coursework (Foundations, Data-Driven Decisions, Data Preparation) – Coursera
- Virtual experience programs (Forage): Accenture Nordics Developer, J.P. Morgan Software Engineering, Tata Data Visualisation
