Professional Summary

Full Stack Engineer with **2 years of professional experience (since Sep 2024)** at an enterprise life-sciences data platform, promoted from **Junior Data Engineer** to **Associate Full Stack Engineer** in 2026. Work spans the stack: **React.js**, **Next.js**, and **TypeScript** on the frontend through **Node.js/Express** and **Python/FastAPI** on the backend, with **SQL** data work throughout. Shipped **10+ reusable components** and features across **4 production dashboards** on ciATHENA 0.1/1.0 within a **20-member agile team**; now building ciATHENA 2.0 with **retrieval-augmented generation (RAG)**, **semantic search**, and **Unified Data Modeling**. Strong in component architecture, REST/SSE integration, and testing (**Jest**, **pytest**).

Experience

CustomerInsights.AI (CIAI)

Gurugram, India

Associate Full Stack Engineer

Apr 2026 – Present

Full-stack ownership on ciATHENA: closing out 1.0 and building 2.0's AI and data-modeling layer, frontend to backend.

- Own end-to-end delivery of full-stack features across **React.js**, **Next.js**, and **TypeScript** (frontend) and **Node.js/Express.js** with **Python** (backend), taking **ciATHENA 1.0** to release and starting **ciATHENA 2.0**.
- Build backend services in **Python** and **FastAPI** for ciATHENA 2.0, using async endpoints and typed request/response validation to serve data- and AI-driven features.
- Develop **retrieval-augmented generation (RAG)** and **semantic search** so users can query platform data in natural language, using text embeddings and vector retrieval to ground answers in real records.
- Build **Unified Data Modeling (UDM)** workflows: source/schema/table selection, entity and column review, mapping explanations, and batch approvals, with role-aware operations.

Junior Data Engineer

Sep 2024 – Mar 2026

Built the analytics interfaces, dashboards, and data-review workflows on ciATHENA 0.1 and 1.0, with the data validation behind them.

- Built production UI in **React.js**, **Next.js**, and **TypeScript** for ciATHENA 0.1/1.0, including **10+ reusable components** that reduced duplicated code and sped up feature delivery across modules.
- Shipped features across **4 production dashboards** on the **ciPARTHENON** platform (**LENS**, **TPA**, **CORE**, **Patient Flow**), with **REST API** integration and responsive desktop-to-tablet (iPad) layouts.
- Built conversational analytics interfaces with streaming (**Server-Sent Events**) responses, session restore, and duplicate-request guards; contributed an **ECharts** fix that recovered **11 product series across 21 months**, covered by **14 regression tests**.
- Contributed to data-review and match-and-merge (MDM) workflows, building review screens, batch approvals, and deterministic safeguards that preserve uncertain matches, backed by **Python** and guarded **SQL**.
- Added **Jest** unit tests, ran end-to-end QA (edge cases, empty/error states, regression), and refactored **5+ modules** in a 20-member agile team.

Technical Skills

- **Frontend:** React.js, Next.js, **TypeScript**, JavaScript (ES6+), HTML5, CSS3, React Hooks, Context API, Material UI, Zustand, TanStack Query, ECharts, Responsive Design, Component Architecture, Performance Optimization
- **Backend & APIs:** Node.js, Express.js, **Python**, **FastAPI**, REST API Design, Server-Sent Events, JSON, **PostgreSQL**, SQL, MongoDB, Pagination & Filtering
- **AI & Data:** Retrieval-Augmented Generation (RAG), Semantic / Vector Search, Text Embeddings, Unified Data Modeling (UDM), Data Validation & Normalization
- **Testing & Quality:** **Jest**, **pytest**, End-to-End QA, SonarQube, Code Review, Debugging, Root-Cause Analysis
- **Tools & Practices:** Git, GitHub, Figma, Microsoft Azure, VS Code, Agile/Scrum, SDLC, Jupyter Notebook, Power BI

Projects

LearnGenix – Full-Stack E-Learning Platform [\[GitHub\]](#)

Dec 2023 – Present

- Architected a scalable e-learning platform with **React.js**, **Node.js**, and **MongoDB** featuring **JWT authentication**, role-based access control, and full CRUD across learning modules.
- Designed responsive UI flows, interactive quizzes, and learning simulations improving engagement and cross-device accessibility.

Churn Prediction & Analysis [\[GitHub\]](#)

Nov 2023 – Dec 2023

- Built an end-to-end ML pipeline in **Python** (EDA, feature engineering, Decision Tree) reaching **93.7% accuracy**, validated with **pytest**; delivered actionable churn-reduction recommendations.

SkySketch – Computer Vision Drawing App [\[GitHub\]](#)

Sep 2023 – Oct 2023

- Developed a real-time, gesture-controlled drawing canvas using **OpenCV**, **NumPy**, and **MediaPipe**; applied iterative testing to stabilize hand-tracking accuracy.

Education

Graphic Era Hill University, Bhimtal, Uttarakhand
B.Tech, Computer Science & Engineering

Aug 2020 – Aug 2024
CGPA: 8.62

Certifications & Achievements

- Data Analysis with Python – IBM / [Cognitive Class](#); Google Data Analytics coursework (Foundations, Data-Driven Decisions, Data Preparation) – [Coursera](#)
- Virtual experience programs (Forage): [Accenture Nordics Developer](#), J.P. Morgan Software Engineering, Tata Data Visualisation
